TikTok Profile

How to Read This Portfolio

A quick guide to understand the services, process, case studies, and work links.

01

Who I Am

AI Video Designer with real audience experience. I create videos that are clear, watchable, and ready for brands, ads, and social platforms.

02

What I Deliver

A full AI video workflow: visual direction, prompt writing, AI image generation, motion direction, editing, and final delivery formats.

03

Where to Review Work

The case study page includes four project groups. Each card has a teal Click Here button that opens the related work folder.

The portfolio answers one question quickly:
Can Fares plan, design, animate, and deliver useful AI video content for my brand?

SERVICES

What I Can Deliver

Focused video production services for brands, campaigns, ads, and cinematic AI scenes.

1 Visual Direction

Define the look, mood, camera style, brand feel, and key visual message before production starts.

2 Prompt Writing

Write detailed prompts that control characters, products, camera, lighting, and continuity.

3 AI Image Design

Create strong keyframes, product scenes, ad visuals, and storyboard images ready for animation.

4 Image-to-Video Motion

Turn still images into controlled motion with camera moves, timing, and action direction.

5 Editing & Assembly

Organize shots, improve pacing, prepare social formats, and make the final video easier to publish.

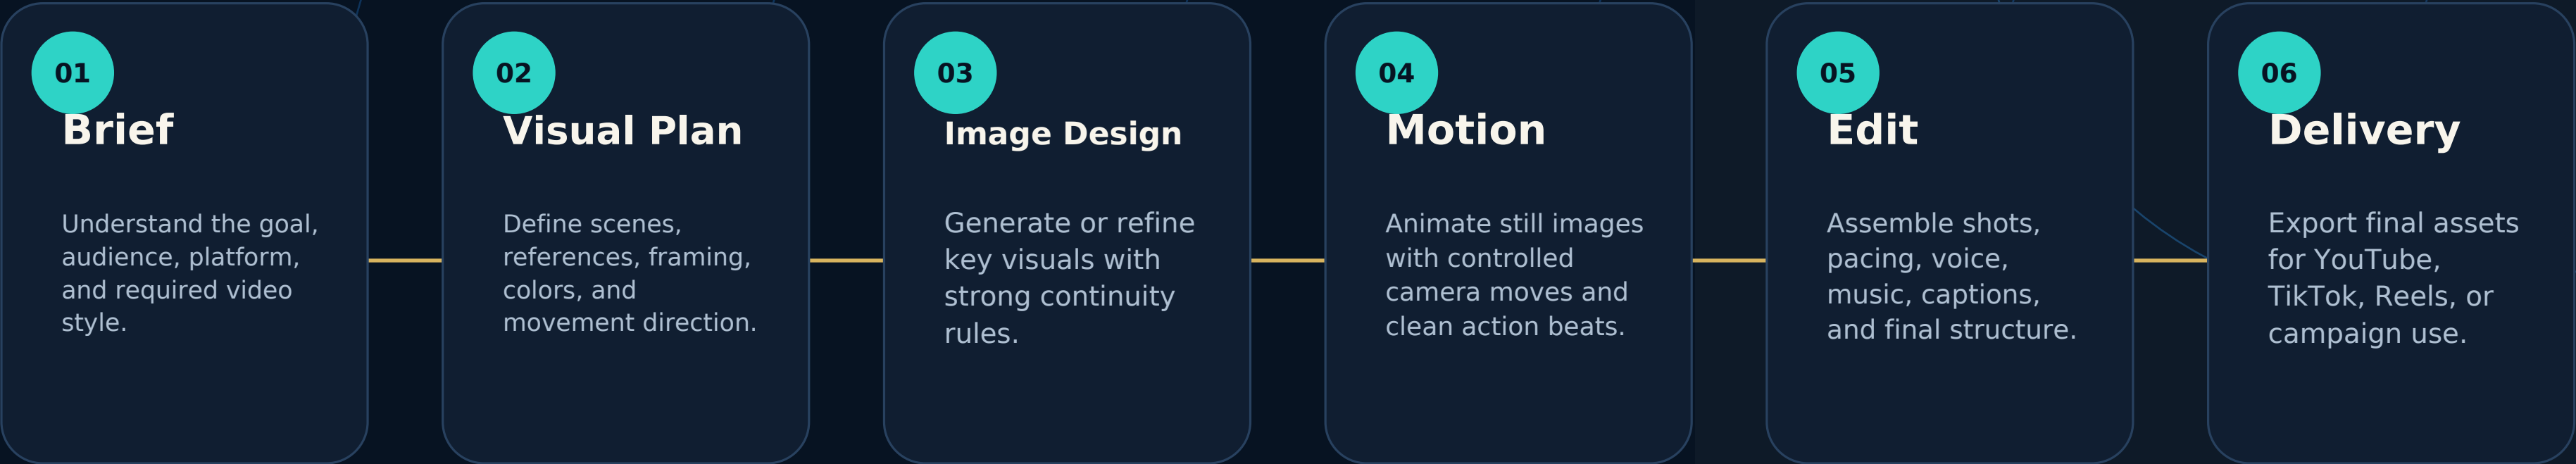

6 Voice & Ad Flow

Support voice-over direction, ad structure, hooks, and delivery style for the target audience.

WORKFLOW

From Idea to Final Video

A clear production path, so the client understands how an idea becomes a finished AI video.

SELECTED WORK

Case Studies in One Page

Four work groups. Each card explains the objective, my role, the output, and includes a Click Here button to review the related folder.

Game Characters

Character & scene production

- OBJECTIVE** Build consistent visual characters and cinematic references for game/video storytelling.
- MY ROLE** Visual direction, AI prompt writing, character continuity, keyframe planning.
- OUTPUT** Character looks, cinematic scenes, and visual references ready for motion.
-  Click Here

Tawasol Riyadh

Commercial ad visuals

- OBJECTIVE** Support Saudi-market promotional videos for fleet tracking and transport services.
- MY ROLE** Ad visual planning, AI scenes, motion direction, branded composition.
- OUTPUT** Ad-ready scenes, app visuals, and social video concepts.
-  Click Here

Rasayd ERP

ERP advertising content

- OBJECTIVE** Turn product benefits into simple visual ads for a business software audience.
- MY ROLE** Creative direction, hook structure, AI visuals, editing-friendly scenes.
- OUTPUT** Short ad concepts explaining ERP value, operations, and business control.
-  Click Here

Mixed Video Works

Various AI video experiments

- OBJECTIVE** Show flexibility across different visual styles, motion ideas, and content formats.
- MY ROLE** Prompt design, shot planning, animation direction, and visual testing.
- OUTPUT** A wider sample of AI video scenes and creative executions.

AUDIENCE ADVANTAGE

Real Platform Experience

Beyond AI tools, I bring practical experience with real audiences and active social platforms.

1M+ YouTube Subscribers

A large audience base gives practical understanding of attention, pacing, hooks, viewer behavior, and platform-ready delivery.

Advertising placements are available on my social pages for suitable brands, campaigns, and promotional collaborations.

Social links are included for audience proof, brand ad inquiries, and direct review of active channels.

WHY WORK WITH ME

Clear Creative Value

The goal is not just to make AI visuals. The goal is to make useful video assets that can be understood, watched, and published.

Brand-ready thinking

I build visuals around the campaign goal, not random effects.

Social pacing

I understand short attention spans, clear hooks, and platform-friendly rhythm.

Arabic / English workflow

I can plan in Arabic and write production prompts in English when needed.

Continuity control

I focus on keeping characters, products, logos, colors, and UI elements consistent.

Practical delivery

Files and scenes are prepared for editing, publishing, and client review.

Ad-friendly structure

I think in terms of opening hook, benefit, proof, and call-to-action.
